

## HOLDBARHED TAKKET VÆRE ENKELHED

Det er vigtigt at se på vores H-trailers. Alle Trailers er konstrueret med en lang levetid og er nemme at vedligeholde. De er også meget fleksible og kan bruges til mange forskellige opgaver. Dette gør dem til en rigtig god investering for enhver virksomhed.

## IN-HOUSE UDVIKLING

Alle Trailers udvikles og produceres i Danmark. Dette sikrer en høj kvalitet og hurtig leveringstid. Vores in-house udvikling betyder også, at vi kan tilpasse Trailers til dine specifikke behov.

Meleat® er et miljøvenligt og effektivt rengøringsmiddel. Det er nemt at bruge og giver gode resultater. Det er også meget økonomisk, da det varer længe og kræver lidt vand.

## EKSPERTER I TILPASSEDE LØSNINGER

Vores eksperter kan hjælpe dig med at vælge den bedste løsning til dine behov. Vi tilbyder forskellige motorer og tilbehør til alle Trailers. Vores kunder er altid i god hånd med os.

## 100% FOSSILFRI / MULTIBRÆNDSTOF

Vores Trailers er 100% fossilfri og kan køre på både diesel og elektricitet. Dette gør dem til en rigtig grøn løsning for virksomheder, der ønsker at reducere deres CO2-aftryk.

## En Trailerpack passer altid

# Trailerpack

proven mechanical technique  
without unnecessary electronics

Also available as electric drive

**TRAILERPACK 250/15 ELECTRIC DRIVE, SAME PERFORMANCE AS THE TRADITIONAL (COMBUSTION ENGINE) TRAILERPACKS!**

The electric powered Trailerpack 250/15 is also developed according to the well-known meclean® philosophy. Meclean® consistently opts for solid functional technology and the best components. This results in a reliable machine that can be used for an entire working day without having to recharge inbetween work.

**ENERGY-EFFICIENT DRIVE AND LITHIUM LiFePO4 BATTERY**

The high-pressure pump in the Trailerpack 250/15 is driven by a new type of electric motor (PMS-IPM) with an efficiency of 97%, which is at least 10% more efficient than ordinary electric motors. The high-quality Lithium LiFePO4 batteries are explosion-proof, have a longer lifespan (up to 4,000 charging cycles), do not need to be fully charged before use and are further characterized by their high energy density and relatively low weight.

## SteamPLUS®

SteamPLUS® is a patented cleaning function that consists of a **balanced mix of 90% steam and 10% water** and a stabilized temperature of 150 °C in combination with an adjustable working pressure up to 250 bar.

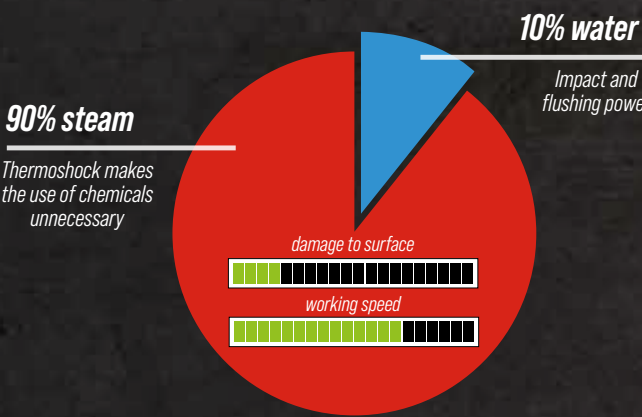

SteamPLUS® can easily be switched on and of with a button on the control panel.

With an additional steam / heat exchanger 17,000 liters(l) of steam - per minute - is produced. This enormous amount of steam creates a "thermoshock" which causes the pollution to come off without damaging the surface. The steam pressure (**adjustable up to 250 bar**) gives working speed that is necessary for large objects/ buildings.

SteamPLUS® is used and recommended by companies that are specialized in facade cleaning of monumental buildings.

### Where and when SteamPLUS® ?

- ✓ When chemicals can not be used and the surface is susceptible to damage
- ✓ SteamPLUS® is suitable - unlike AquaPLUS® - for damage sensitive surfaces such as facades with less strong joints, monumental buildings, sandstone objects, wooden objects, etc.
- ✓ SteamPLUS® removes graffiti, paint layers, chewing gum, atmospheric pollution, algae and moss, fungi, oil and resin, adhesive layers, road markings, etc. without chemicals
- ✓ Disinfection and odor control thanks to the high steam percentage

Facade cleaning: without chemicals and damage

Chewing gum removal: in less than 2 seconds (2.000 - 3.000 pieces per hour)

## AquaPLUS®

AquaPLUS® is a **mix of 90% water and 10% steam** that comes out of the spray lance at a stabilized temperature of 110 °C and an adjustable pressure up to 500 bar (depending on model).

AquaPLUS® can easily be switched on and of with a button on the control panel\*

\*AquaPLUS® is only possible in combination with SteamPLUS®

AquaPLUS® is a cleaning function inbetween traditional (hot) water high pressure and SteamPLUS®. The balanced mix of superheated water and steam take advantage of both mentioned functions. Water provides impact and flushing power and the fairly low steam amount still creates a limited thermoshock effect so no chemicals are needed for perfect cleaning results.

### Where and when AquaPLUS® ?

- ✓ When no chemicals can be used and the surface is **not** susceptible to damage
- ✓ AquaPLUS® in some cases cleans at a higher speed than SteamPLUS®, because the percentage of water is higher. However, the high water percentage also causes more damage to the surface compared to SteamPLUS®
- ✓ AquaPLUS® is suitable for industrial cleaning and removes graffiti, paint layers, atmospheric pollution, resin, glue layers, road markings, etc. without chemicals

Facade cleaning

Graffiti removal: without chemicals

## WeedPLUS®

WeedPLUS® is a hot water weed control function. WeedPLUS® works with pure, clean (drinking) water, no pesticides needed. By overheating the weed plant proteins coagulate and are clogging the cells, which leads to effective and environmental-friendly weed control.

WeedPLUS® can easily be switched on and of with a button on the control panel.

Fighting weeds with WeedPLUS® is possible everywhere. With the shower nozzle and spray bar on wheels it is possible to work extremely selectively without collateral damage.

Because the working speed is up to 30% higher than other alternative weed control methods and up to 60% fewer treatments are required, WeedPLUS® is also economically the best alternative. With WeedPLUS® a maximum of 2,000 m² per hour can be controlled.

### Proven to be most effective

- ✓ Only 4 treatments per year (compared to 8 treatments with hot air / burning)
- ✓ Substantially lower weed percentage throughout the year (compared to all other methods)

Fighting weeds with hot water has been carried out by the University of Copenhagen (research by Prof. P. Kristoffersen) researched and is clearly the most effective alternative weed control method (see diagram below):

Weeds on pavement

Weeds on pavement 2 - 5 days after treatment
